

CONSTRUCTION MATERIAL

MLG owns and operates quarries at Cane Grass, Tarmoola, Eight Mile, and Jonah Bore, strategically located near major mining hubs of Leinster, Leonora, Kalgoorlie, and Coolgardie. With a focus on quality and accessibility, MLG is dedicated to delivering high-grade aggregates, gravel, and sand to meet diverse project requirements.

JONAH BORE
Screened & Unscreened Sand

END-TO-END AGGREGATE AND SAND SUPPLY CHAIN SOLUTIONS

Managing the entire process from quarrying to delivery, MLG extracts, crushes, and screens materials on-site, providing high-quality aggregates, gravel, and sand tailored to client requirements. By prioritising quality and accessibility, MLG delivers end-to-end solutions to meet the demands of diverse projects.

TARMOOLA
Aggregate Material

CANE GRASS
Screened & Unscreened Sand

EIGHT MILE
Gravel

CANEGRASS SCREENED SAND

MLG's Cane Grass Sand quarry supplies high-quality screened sand products, supporting mining and construction projects with reliable, efficient, and sustainable materials tailored to client needs.

CONSTRUCTION MATERIAL PRODUCTS RANGE

ROAD BASE PRODUCTION

MLG offers Underground All-In Road Base for heavy loads in underground operations, as well as 20mm road base for surface haul roads, and pre-mixed 10/7mm shotcrete and 20mm concrete for durable construction and infrastructure applications.

10/7MM, 14MM, AND 20MM AGGREGATE PRODUCTION

MLG supplies aggregates, gravel, and sand from quarries near Goldfields hubs, meeting the mining and civil sectors' needs with reliable, high-quality materials.

CRUSHER DUST

MLG's crusher dust is a finely crushed rock ideal for paths, driveways, compacting bases, and landscaping projects, offering excellent compaction, a smooth finish, and economical reliability.

SAND SUPPLY

UNSCREENED SAND

MLG's un-screened sand is a cost-effective, natural fill material ideal for mining, civil construction, agriculture, and site preparation, offering stability and bulk for large-scale projects.

SCREENED SAND

MLG's screened sand is finely processed for precision and stability, ideal for construction, mining, landscaping, and roadworks, offering a reliable base for concrete, asphalt, and pavers.

GRAVEL SUPPLY

GRAVEL

MLG mines naturally occurring laterite from company owned leases that meets AS501 specification, meeting MRDWA standards, used for highway construction, mine haul roads and public road infrastructure.
